

This report provides information about each high school and its graduates who:

- 1. Graduated from a Kentucky high school in 2002
- Took the ACT and
- Entered a public university, two-year college, or participating independent university in Kentucky, in fall 2002

This report contains the following four sections

- 1. College Attendance and Enrollment Patterns
- 2. College Performance Patterns at Four-Year Public Universities
- 3. College Performance Patterns at Two-Year Colleges
- 4. College Performance Patterns at Four-Year Independent Colleges

How should this report be used?

- Comparisons to district and state level statistics are meaningful indicators of student readiness for college.
- The most attended postsecondary institutions and degree status tables indicate student enrollment patterns after high school graduation.
- Prior year reports may be used to assess overall trends but should not be considered equivalent historical comparisons because of recent data refinements and changing lists of participating institutions.

What's in this report?

- College-going patterns of graduating high school seniors help document student transition.
- Detailed student performance information, extracted from university student records, document high school graduate experience in their first year of college.
- State level and district level information for all student performance measures are included for comparison.

What's not in this report?

- Graduates from Kentucky high schools who attended out-of-state colleges or non-participating Kentucky independent colleges are excluded.
- Numbers are not reported in cases where there are fewer than five students.
- Universities often select a student's highest ACT subscore to help determine student math and English course placement. The High School Feedback Report, prepared by ACT, uses the student's last score, which can be lower.

College Attendance and Enrollment Patterns

This section answers the following questions about college enrollment of high school graduates:

- 1. How many seniors were included in this report?
- 2. What percentage of seniors enrolled in a participating Kentucky college?
- 3. What percentage of college freshmen from your high school returned for their second year?
- 4. Where did your high school graduates enroll?

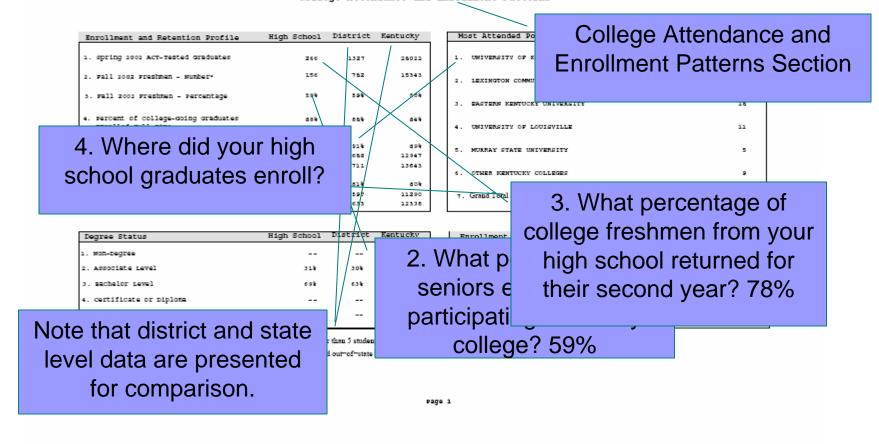

2002 Kentucky High School Feedback Report

Performance of ACT-tested High School 2002 Graduates in Their First Year of College at Participating Institutions

College Attendance and Enrollment Patterns

College Performance Patterns

Pages 2 through 4 describe college freshmen academic performance for fall 2002 and spring 2003 semesters and for each postsecondary sector.

This section answers the following questions:

- 1. What was the first year college GPA of your high school graduates?
- 2. How many hours were earned by the end of their first year?
- 3. What percentage of graduates scored below 18 for placement in math or English developmental courses?
- 4. What percentage of students in each ACT sub score level enrolled and passed both developmental courses, and college-level courses?
- 5. What percentage of students took at least one remedial course in either math or English?

3. What percentage of graduates scored below 18 for placement in math developmental courses?

There were 95 graduates with math course enrollments who were tracked for this report.

20% of the 95 graduates earned a math sub-score on the ACT below 18

College Performance Patterns

| - | | | | 1 | | Ī |
